Precautions for Use

Follow these safety instructions and read these helpful tips before setting up and using the projector.

Important Safety Instructions

	Do not disassemble the projector. If needed, please contact your dealer for repair/replacement.
	Do not use the different power source, it may result in fire or electric shock. Please use the indicated type of power source.
	Do not look into the lens when the projector is operating. The bright light may damage your eyes.
	Do not use the projector near water or sources of heat.
	Place the projector on an even surface or stable stand. If the projector is mounted on a ceiling, it should be installed by qualified mounting hardware which designed for use with this projector.
	Unplug the projector after powering down.
	In order to maintain the performance and reliability of the projector, please leave at least 30CM between the projector and the wall.

Helpful Tips

For incredible clarity and optimum results, operating the projector in a dark environment is recommended.

You may adjust the focus ring and keystone simultaneously until to get crystal clear images.

Please understand that the projector makes noise for heat dissipation during working. Nevertheless, it will not affect watching experiences when connected to an audio device.

Projector is ideal for home entertainment, such as videos watching, photos viewing and games playing etc. Please be advised that the projector is not for business data presentation.

Easy-to-use Setup and Operation Features

- User-friendly operating system

- Innovative keystone correction ring for flexible projector placement

Troubleshooting

As a high-tech product, the projector combined with optical, mechanical and electronic components and equipped with a protective and complicated circuit inside. To quickly solve your problems and to prevent improper using and settings, please follow operations below. If your problems or enquiries cannot be eliminated after reading the table, please do not hesitate to contact us.

Problem Description	Troubleshooting
The projector won't turn on	Check if the power source is the indicated one and the power cord is connected correctly. Make sure the power cord is not defective.
Lamp does not work after turning on the projector	Ensure power cord and power source are connected correctly. If the lamp gets damages, please contact us to replace the lamp
No images	Check whether the format and resolution of images are supported by the projector.
No response from remote control	Check whether batteries of the remote control run out or are installed correctly. Make sure there is no obstacle between the remote control and IR receiver. Always use the remote control within its effective distance (4m).
Obscure/Blurred images	Please rotate the focus ring, adjust the keystone and throw distance until the projected image is clear. Ensure the lens is clean.
Abnormal sound	Ensure the audio device is connected correctly and function well. Check if the mute or minimum volume mode is set.
